Advanced Glucose Discovery

“Greatly lowers blood sugar levels and improves heart health using the proven power of the pomegranate”

- ✓ Perfect for men and women of all ages looking to maintain their heart health and support healthy blood glucose levels
- ✓ In a double-blind, placebo-controlled study, 600 MG's of this patented Pomegranate extract—in a single month—was shown to:

- Increase good cholesterol by 215%
- Decrease oxidized bad cholesterol by 64%
- Decrease triglycerides by 47%
- Decrease blood glucose levels by 60% after eating
- Decrease HbA1c levels by 40%
- Decrease homocysteine levels by 57%

- ✓ Advanced Glucose Discovery offers you the full 600 MG clinical dose that produced the stunning results above
- ✓ Advanced Glucose Discovery is ours alone—no one else offers it

“Ancient fruit finds new life in breakthrough heart health and glucose support remedy”

Advanced Glucose Discovery also includes Chromium as Crominex® 3+, a highly bioavailable, critical micronutrient known for its role in healthy glucose metabolism.

Crominex® 3+ demonstrated its efficacy in five crucial areas:

1. Significantly increasing glutathione
2. Significantly increasing nitric oxide.
3. Reducing MDA, a marker for oxidative stress.
4. Substantially lowering the inflammatory marker, HS-CRP.
5. Reducing the reflection index, suggesting endothelial improvement.

Crominex® 3+ is optimized with Indian gooseberry and a patented shilajit extract that maximizes its heart health benefits.

Another key addition to Advanced Glucose Discovery is Gymnema extract, which was shown in recent studies to significantly reduce blood glucose levels, HbA1c, and other glycosylated blood proteins.

Gymnema significantly reduces the metabolic effects of sugar by preventing the intestines from absorbing the sugar molecules during the process of digestion.

For further information our white paper is available upon request, Advanced Glucose Discovery is Halal certified and NON-GMO.
